

**STAY
FIRE
SAFE**

Smoke alarms save lives. Properly installed and maintained smoke alarms give early warning to help you escape a fire safely.

- Install at least one smoke alarm outside each sleeping area and at least one on each level of your home.
- Test smoke alarms monthly.
- When the clocks change twice a year, change your smoke alarm batteries, too.

Fire moves fast and can leave as little as one or two minutes for you to escape safely once the smoke alarm sounds. Make a fire escape plan for your household in advance.

- Plan your escape with two ways out of every room.
- Choose a meeting place outside.
- Practice your escape plan twice a year.
